Computer Science and Engineering · Artificial Intelligence and Data Science ·
Artificial Intelligence and Machine Learning

Bannari Amman Institute of Technology, Sathyamangalam

Compiled from official department pages of bitsathy.ac.in (Computer Science and Engineering, Artificial Intelligence and Data Science, Artificial Intelligence and Machine Learning, and related Special Labs pages), August 2026.

Department	Programme	Established
Computer Science and Engineering (CSE)	B.E. (4 yrs) + M.E. (2 yrs)	1996
Artificial Intelligence and Data Science (AI&DS)	B.Tech. (4 yrs)	2020
Artificial Intelligence and Machine Learning (AI&ML)	B.Tech. (4 yrs)	2021

1. Department of Computer Science and Engineering (CSE)

The Department of Computer Science and Engineering is one of BIT's founding departments, established in 1996. It offers a 4-year B.E. (Computer Science and Engineering) programme and a 2-year M.E. (Computer Science and Engineering) programme. The B.E. programme has been re-accredited by the National Board of Accreditation (NBA), New Delhi, for a period of 6 years. The department is also recognised by Anna University, Chennai, as a centre for Ph.D. / M.S. (by Research) programmes.

The department maintains well-equipped, spacious laboratories with modern computing infrastructure, and its faculty bring a mix of academic, industry and research experience across the core areas of computer science.

1.1 Vision

To excel in the field of Computer Science and Engineering, to meet the emerging needs of the industry, society, and beyond.

1.2 Mission

- To impart need-based education to meet the requirements of the industry and society.
- To equip students with emerging technologies, global professional standards, and ethical values to promote sustainable societal development.
- To build technologically competent graduates for industry and entrepreneurial ventures by providing state-of-the-art infrastructure and skilled human resources.

1.3 Programme Educational Objectives (PEOs)

- Graduates will apply core computer science and engineering principles to design and implement effective solutions for real-world industry and societal problems through strong technical competence and problem-solving skills.
- Graduates will acquire domain knowledge and research orientation to pursue higher education, adapt to emerging technologies, and develop innovative solutions that address socially relevant and sustainable challenges.
- Graduates will demonstrate effective communication, ethical conduct, leadership, teamwork, and social responsibility, and engage in lifelong learning to succeed in professional, entrepreneurial, and multidisciplinary environments.

1.4 Programmes Offered

Level	Programme	Duration
Undergraduate	B.E. – Computer Science and Engineering	4 years
Postgraduate	M.E. – Computer Science and Engineering	2 years
Doctoral	Ph.D. / M.S. (by Research) – recognised research centre under Anna University	Variable

2. Department of Artificial Intelligence and Data Science (AI&DS)

The Department of Artificial Intelligence and Data Science was established in 2020 and offers a 4-year B.Tech. (Artificial Intelligence and Data Science) programme. The department has a dedicated faculty team and maintains state-of-the-art laboratory facilities supporting smart-class learning.

2.1 Vision

To build a conducive academic and research environment to produce competent professionals for the dynamic needs of the emerging trends in the field of Artificial Intelligence and Data Science.

2.2 Mission

- To establish a unique learning environment and enable students to face the challenges in Artificial Intelligence and Data Science.
- To critique the role of information and analytics for a professional career, research activities, and lifelong learning.
- To produce competent engineers with professional ethics and life skills.

(Vision and mission as published in the department's Revised Regulations 2018 curriculum document and the department overview page.)

2.3 Programme Offered

Level	Programme	Duration
Undergraduate	B.Tech. – Artificial Intelligence and Data Science	4 years

3. Department of Artificial Intelligence and Machine Learning (AI&ML)

The Department of Artificial Intelligence and Machine Learning was established in 2021 and offers a 4-year B.Tech. (Artificial Intelligence and Machine Learning) programme. Like AI&DS, it maintains modern laboratory infrastructure and smart-class learning support.

3.1 Vision

To achieve excellence in the field of Artificial Intelligence and Machine Learning by focusing on knowledge-centric education systems, integrative partnerships, innovation and cutting-edge research to meet the latest industry standards and serve the greater cause of society.

3.2 Mission

- To develop professionals skilled in the field of Artificial Intelligence and Machine Learning.
- To impart quality and value-based education and contribute towards the innovation of computing, expert systems, AI and ML to solve complex problems in research and society.

3.3 Programme Offered

Level	Programme	Duration
Undergraduate	B.Tech. – Artificial Intelligence and Machine Learning	4 years

4. Related Computing Programmes at BIT

Alongside CSE, AI&DS and AI&ML, BIT runs several closely related computing-discipline departments. These are listed here for context, since prospective students often compare them:

Department	Programme	Established / Notes
Information Technology	B.Tech. – Information Technology	Established department; runs alongside CSE
Computer Science and Design	B.E. – Computer Science and Design	Established 2022
Computer Science and Business Systems	B.Tech. – Computer Science and Business Systems (TCS-powered curriculum)	Curriculum approved/powered by Tata Consultancy Services
Information Science and Engineering	B.E. – Information Science and Engineering	Listed under Programmes Offered
Computer Technology	Interdisciplinary computing initiative	Inaugurated 2019

Note: BIT frequently groups CSE, IT and Information Science and Engineering together for joint academic and conference activity (e.g., the department cluster "CSE, IT & ISE" organises the International Conference on Artificial Intelligence & Smart Computing).

5. AI-Related Laboratories & Infrastructure

Beyond the standard curriculum labs mandated by Anna University / AICTE, BIT runs a network of "Special Labs" and collaborative/industry-partnered labs, several of which are directly relevant to AI, Machine Learning and Data Science students across departments.

5.1 Special Labs (AI/Data-relevant)

Lab	Focus
Artificial Intelligence Lab	Machine learning techniques spanning NLP, deep learning and computer vision, aimed at intelligent decision automation and human–AI collaboration; also organises AI training/workshops.
AI based Industrial Automation Lab	AI-enabled robotics, Industry 4.0 factory automation, vision systems, PLC/VFD/servo integration, IIoT using Raspberry Pi, ESP8266, LoRaWAN and Jetson Nano; established July 2018.
AI & Smart Sensor Lab	Intelligent sensor-based product development and AI-ML based product design (under the Electronics & Instrumentation Engineering special-labs cluster).
Data Science Lab	Research and student projects in data science, proof-of-concept development for industrial problems, and participation in national/international competitions.
IoT Lab	Smart-city and IoT applications combined with AI-based analytics.

5.2 Collaborative / Industry-Partnered Labs

- BIT – NVIDIA Jetson Embedded AI/DL Lab — embedded AI and deep-learning development on NVIDIA Jetson hardware.
- BIT – Center for Cyber Physical Systems
- BIT – Centre of Excellence in Special Machines and Drives

- BIT – OPAL-RT Innovation Centre for Rapid Prototyping
- BIT – Siemens Centre of Excellence in Electrical Drives and Automation

The full current list of collaborative labs is published at bitsathy.ac.in/collaborative-labs/.

5.3 Laboratory Incharges (Computing Departments)

Department	Lab Incharge (as published)
Information Technology	Dr. Sundaramurthy
Artificial Intelligence and Data Science	Prof. Balasamy K
Computer Science and Business Systems	Prof. Madhumitha A
Computer Science and Engineering	Prof. Sathyamoorthy J

The above incharges are specifically listed for the “Industrial Web and Mobile App Development” special lab; department-wise faculty and HOD details are covered comprehensively in the companion document, “BIT Faculty and HOD Directory”.

6. Placement & Industry Context

CSE, AI&DS and AI&ML graduates are among BIT's most actively recruited cohorts. Recent placement drive highlights reported on the institute's home page and press material include recruiters such as Amazon, Juspay, Thoughtworks, Cadence, Swiggy, Flipkart, Pega, Baker Hughes and Caterpillar, with individual packages for top offers reported up to roughly Rs. 27 LPA (Juspay) in recent drives.

A dedicated, more detailed placement breakdown (company-wise visits, dream/super-dream offers, average and highest packages) is covered in the companion document, “BIT Placements and Career Report”.

7. Admission Route

Admission into B.E. CSE and B.Tech. AI&DS / AI&ML follows the same overall institute-level process described in the companion “BIT Admissions Guide 2026” document: Government Quota seats via TNEA counselling (Counselling Code 2702) based on Class XII marks, and Management Quota seats via direct application to the institute. As high-demand branches, Computer Science and AI-related programmes have historically closed at some of the higher TNEA cutoff ranks among BIT's offered branches.
